STAR WINDER MACHINE

THE STAR WINDER IS OUR LATEST AND MOST VERSATILE BOBBIN WINDER FROM GORMAN MACHINE CORP. IT IS BUILT ON THE CHASSIS OF THE PROVEN BOBBINEER WINDER. ALL THE INTERNAL WORKINGS ARE CHANGED ALONG WITH THE ELECTRONIC CNC CONTROLLER WHICH STORES THE PROGRAMS ENTERED FOR UP TO 1000 DIFFERENT PROGRAMS AND CAN BE CALLED UP SEPARATELY OR IN GROUPS AT ANY TIME.

THE GORMAN STAR WINDER MACHINE

THE MACHINE IS DRIVEN BY A POWERFUL 3/4 HP DC MOTOR THROUGH FOUR DIFFERENT SPEED TORQUE RANGES. THE HIGHEST SPEED RANGE GIVES A SPINDLE SPEED OF UP TO 10,000 RPM. THE LOWEST SPEED RANGE HAS ONE FIFTH THE TOP SPEED, BUT WITH 5 TIMES THE SPINDLE TORQUE FOR WIRES AS HEAVY AS 12 AWG (.08" OR 2mm), UP TO THE FINEST. THE WINDING PROGRAM FOR A COMPLETE COIL OF SEVERAL WINDINGS IS STORED IN SEVERAL DIFFERENT STEPS OR LEVELS. EACH LEVEL WOULD HAVE A STARTING POSITION, A BOBBIN WIDTH AND A WINDING PITCH PER TURN AND TOTAL NUMBER OF TURNS. TWO DIFFERENT POWER SETTINGS UP TO 99, DETERMINE LOW SPEED AND HIGH SPEED WINDINGS. WINDING DIRECTION FROM THE START POSITION CAN BE PROGRAMMED TO THE RIGHT OR TO THE LEFT. IF AN AUTO START IS WANTED FOR THE NEXT WINDING, PRESS AUTO START BUTTON AT THIS LEVEL AND THE WINDING WILL START UP IMMEDIATELY AT THE START OF THE NEXT LEVEL OR STEPS. IF A WINDING PROGRAM WITH A PITCH AND RPM COMBINATION WHICH EXCEEDS THE MACHINE LIMITS IS ENTERED, THERE IS A SIMPLE FORMULA IN THE MANUAL, WHICH GIVES THE OPERATOR CORRECTIVE PROCEDURES. ELECTRONIC CONTROLLED TRAVERSE WITH A STEPPING MOTOR DRIVE FOR PRECISION WINDING.

WE SUPPLY OUR OWN OPERATORS MANUAL FOR THE ELECTRONIC CNC CONTROLLER ALONG WITH THE MANUFACTURERS.

WE, AT GORMAN MACHINE, KNOW YOU WILL APPRECIATE THE DURABILITY, CONSTRUCTION AND PROFITABILITY OF THIS FINE MACHINE AT AN AFFORDABLE PRICE.
